

SPNA 2015-Conference

This second conference is an initiative of Department of Applied Mathematics, Faculty of Natural Sciences, University of Tirana and aims at bringing together researcher and practitioner to present and to discuss recent results and developments in statistical fields or numerical fields, in methods and methodology for data analysis and applications in statistics, probability, random processes, numerical analysis, optimization and scientific computing.

We want to thank all the participants for their very serious involvement and contribution. The way we approach this conference is a motivation for us to keep periodically similar events, that's for sure will contribute for our professional information and performance. The experience of the first Conference was very successful and fruitful and pushed us to continue.

A special thanks goes for our invited speaker, which supported us in this organization and gave his scientific contribution in this event.

We are grateful to the leadership of Faculty of Natural Sciences for the administrative sustain the all the feedback such an organization needs.

Following is a list of titles of presentations and also the abstract contents.
